ABOUT ME

Research-oriented Computer Science and Engineering student with hands-on experience in image processing, remote sensing, computer vision, and machine learning. Primarily interested in image perception and learning-based methods for reconstructing, interpreting, and extracting meaningful information from visual data.

EXPERIENCE

HEX20

Apr. 2026 – Current

Space Data Science Intern

Trivandrum, India

- Generated synthetic NIR bands using U-NET and modeled water quality on Sentinel-2 imagery.
- Extracted satellite datasets from NASA, Copernicus, and Google Earth Engine (GEE).
- Implemented an ETL pipeline for feature extraction.
- **Skills:** Remote Sensing . Data Analytics . Image Processing . GDAL . XArray . GEE

Edunet Foundation

May 2025 – Jul. 2025

Azure AI Intern

- Deployed machine learning models using Microsoft Azure AI services.
- Used Azure Machine Learning for model training and deployment.
- Managed datasets with Azure Blob Storage and integrated APIs into machine learning workflows.

Acmegrade

Nov. 2023 – Jan. 2024

AWS Cloud Intern

Bengaluru, India

- Worked with AWS services including EC2, S3, and Lambda.
- Configured AWS Elastic Load Balancers (ELB) to distribute traffic efficiently.
- Implemented IAM policies.

PROJECTS

MAASH: Context Guard

- Developed a prompt-engineering-based context guard that generates targeted suggestions to restore essential project context during interactions with large language models.
- Fine-tuned a model to generate context-aware recovery prompts for development workflows across different AI models, helping maintain continuity during extended sessions.
- **Technologies:** Prompt Engineering . Instruction Fine-Tuning . Natural Language Processing . Context Management

Super Resolution for Satellite Images using ESRGAN for Remote Sensing Applications

- Developed a super resolution model using an Enhanced Generative Adversarial Network, enabling improved image clarity.
- Achieved increased efficiency over CNN-based super resolution models, enabling application to satellite and remote sensing use cases.
- **Technologies:** Python3 . PyTorch . NumPy

Decentralized Research Gap Resolution DApp

IIT Bombay TechFest 2025 Hackathon

- Designed a decentralized bounty platform for resolving research gaps, combining distributed web-scraping-based originality verification with blockchain consensus.
- Implemented task creation, cryptographically signed solution submissions, majority-based validation, and transparent on-chain bounty distribution.
- **Technologies:** Rust . Anchor . Solana/K2 . React.js . IPFS

Predicting Crop Yield in India using Machine Learning

- Compared and analyzed predictive models to find the best crop yield prediction approach using a dataset spanning annual rainfall, fertilizer usage, pesticide application, geographical state, crop type, and seasonal attributes.
- **Technologies:** NumPy . Pandas . Scikit-Learn . Seaborn

PUBLICATIONS

Real-Time Safety Monitoring for Construction Sites

IEEE ICAET-2025

- Developed an attendance system to detect and ensure worker safety using computer vision and IoT, logging workers via an RFID reader and permitting entry only with proper safety equipment
- Ensured a safe working environment and hazard-free construction sites
- **Technologies:** RFID Reader (MFRC522) . Raspberry Pi4 . YOLOv7 . OpenCV . Flask . MySQL
- **DOI:** 10.1109/ICAET63349.2025.10932179

PATENTS AND COPYRIGHTS

PHALCON: Phishing Heuristics and Layered Classifier over Networked Intelligence

2026

Copyright – Application Pending

Indian Copyright Office

EDUCATION

Christ (Deemed to be University)

Jun. 2023 – Current

B.Tech. (Hons.) in Computer Science and Engineering

Bengaluru, India

GPA: 3.4

Sunrise English Pvt. School

Jun. 2017 – Apr. 2023

Class XII - CBSE; Percentage: 72%

Abu Dhabi, UAE

SKILLS

Programming Languages : Python3 . Java

Libraries/Frameworks : PyTorch . NumPy . Pandas . Scikit-Learn . Streamlit . GDAL

Tools/Platforms : Git . VS Code . Jupyter Notebook . Linux . Jetson Nano . IBM SPSS . Apache Hadoop . Google Earth Engine

Databases : MySQL . MongoDB

CERTIFICATIONS

Supervised Machine Learning: Classification and Regression – Stanford University

Advanced Learning Algorithms – Stanford University

Data Science Foundations – IBM

Azure Data Fundamentals – Microsoft

Data Science 101 – IBM

Machine Learning Onramp – MathWorks

Face Recognition Using Python – Udemy

Use Generative AI – IBM

Operating Systems Fundamentals – Scaler

100 Days of Code: Python Bootcamp – Udemy

The Complete Full Stack Web Development – Udemy

Introduction to MongoDB for Students – MongoDB

ACHIEVEMENTS

Sustainability Track Winner

IIT Bombay TechFest 2025 Hackathon

- Won the Sustainability Track for developing a decentralized research-gap resolution DApp with blockchain-based validation and transparent bounty distribution.

Project Presentation

NASSCOM Tech Forge 2026

- Presented a project to industry professionals at NASSCOM Tech Forge 2026
